RESUME

Intuitive and creative developer, I like to build reliable apps with great aesthetics by applying UI & UX fundamentals.

SKILLS

React-js, Next-js, JavaScript, TypeScript, Node-js, HTML, CSS, and UI & UX with Figma.

EXPERIENCE

Frontend Engineer, Stone - *August/2021 - Present - Remote*

Rio de Janeiro, BR

- At this company, I developed financial solutions for a South America Bank. Using Next.js, TypeScript, JEST, and React-query as the main stack. I have to attend strict deadlines following government rules. Improved list performance render from 8 to 3 seconds using modern render techniques. Created internal lib to deal with dynamic multi-step forms maintaining state data.

Frontend Engineer, Swag Scan Inc- *March/2021 - July/2021 - Remote*

Utah, US

- Maintenance and development of a reward system application, implementing responsiveness and applying a design from an adobe prototype.

FullStack Engineer, CampoLab - *February/2021 - August/2021 - Remote*

Goiânia, BR

- Creation of an agribusiness app to help flock management with feed ratio calculation and daily milk production weighing. Using React, Next, Node and TypeScript

Frontend Engineer, JAG digital agency - *June /2020 - January/2021 - Remote*
Rio de Janeiro, BR

- Creation of a variety of applications with React, Next and TypeScript.

PERSONAL PROJECTS

FichasJá:

- ☐ Created with React-js and node-js, the application consisted of buying chips for a poker game, the player paid the chip through a payment method.

Sushi:

- Created with Next-js, the app provided an ordering and shopping system for a Japanese food restaurant
